RE: Durawear Demo

It has been close to a year since you provided and installed the demo H.O. Bostrom SCBA seat with the Durawear material in Pumper E-23. As you are aware from your follow up visits, the Durawear material is performing very well.

To date the seat material has not ripped or shown any significant signs of wear.

We were so impressed with this product the City of Cleveland purchased three (3) new Pumpers and two (2) aerial ladders in 1999 with H.O. Bostrom Durawear seats. There are currently eight (8) apparatus being purchased in 2000 that have H.O. Bostrom Durawear seats specified.

As we discussed earlier this week, I am interested in purchasing the Durawear material from H.O. Bostrom to recover worn seats that were originally covered with vinyl.

Thank you for introducing us to this product and keep up the good work.
