

## Configuration & Installation

The Standard Pro Pedestal® has a 2-7/8" diameter post designed to fit all swivel mounts and spider/slider seat adapters. A square plate adapter is used to fit flat bottomed seats and bench or bolster seat frames. The adapters also allow some height adjustability and conversion to a 4" diameter swivel. Pro Pedestal® has a circular base for deck mounting with a standard 6-hole pattern and 8-3/16" bolt diameter. Rectangular or flat-sided bases are also available for tighter space requirements. Pro Pedestal® is a heavy duty pedestal for use in commercial and military applications where dual pedestals have been used with larger seats and rougher sea conditions.

### Benefits:

- \* Single Pro Pedestal® is strong enough for larger occupants and helm chairs
- \* Large 3.5" diameter lower tube allows attachment of foot rests that can be stood on
- \* Longer shock travel of 5" results in more comfort and impact mitigations greater than 50%
- \* Maximum comfort and safety in offshore and extreme boating conditions
- \* Makes boating more enjoyable allowing longer trips and greater satisfaction
- \* Lower cost than competitive pedestal models or complex seating systems
